Mahre Training Center Ski Camp Program Overview

In the three-day or five-day program, you will go through on-hill exercises that emphasize fundamentals, balance and your natural skiing stance. Skiers of all levels will learn new skills and see improvement. These same drills and progressions were used by Phil and Steve Mahre to win Olympic medals. The Mahre Training Center at Deer Valley offers you the rare opportunity to improve your skiing skills while enjoying the ski vacation of a lifetime.

One of the Mahre twins will join you and your group on the hill for hands-on skiing demonstrations and pointers. You will receive daily instruction by Deer Valley's professional ski instructors. All coaches are personally trained by Phil and Steve Mahre and chosen for their ability to communicate, demonstrate and interact with their students.

What to Expect on Your First Day

The first morning of the camp you will need to arrive ready to ski. Participants will then be divided into groups of 5 to 7 skiers according to the ability zones listed on our website. We ask that you choose the ability zone that you can ski in all snow conditions and types of terrain. This is critical to the success of the groups. Groups stay with the same instructors for the duration of the camp. This program focuses on fundamental drills at slow speeds to improve your skiing. Every group works on the same drills no matter the ability of the group.
